## Recap on STPC and citizen science

1. EPA response sent to the OIG -- Concurred on all 4 recommendations.
2. Draft workgroup charge sent to STPC Aug 15 -- Synthesize OIG/NACEPT recommendations and implement key activities. Any additional comments due Sept 21.
3. Workgroup participants -- ORD, OAR, OGC, OLEM, OW, OEI, OP, OCSPP, Regions 1, 2, 3, 4, 5 & 7.
4. Proposed approach -- workgroup focus on strategy/vision and capacity building (recommendations 1 and 4).

Consult with OEI (and others) on how to complete recommendation 2 on data management and quality assurance -- STPC workgroup won't take the lead

OEI, ORD, and Region 1 will follow through on Recommendation 3

## Propose that workgroup focus on OIG recommendations 1 and 4

### Workgroup products

**Vision/Strategy** – Create EPA's strategic vision and objectives for managing the use of citizen science that links to EPA's strategic goals, identifies implementation roles/responsibilities, & plans for necessary staff/budget resources. (*Recommendation 1*)

**Capacity Building** – Prepare guidance on EPA's use of citizen science, and expand EPA staff awareness of citizen science resources. (*Recommendation 4*)

- A. **Finalize checklist** on administrative and legal factors for agency staff to consider when developing citizen science projects, and develop procedures that ensure compliance with steps in the checklist
- B. **Plan training** for program/regional staff on how to effectively use citizen science
- C. **Prepare communication and outreach strategy** that will includes materials that highlight project successes and how EPA has used citizen science results.

## Explore with OEI how to implement OIG recommendations 2 and 3

**Data management** – Assess how to improve EPA guidance and practices on citizen science data management and create an action plan for data management requirements for citizen science, including sharing and using data, data format/standards, and data testing/validation. (*Recommendation 2*)

**QA handbook** – ISSUE EPA QA handbook for citizen science and Implement an external and internal outreach and communications plan to help EPA, states and tribes, and citizen science groups to strengthen quality assurance practices (*Recommendation 3*)

## How to create a useful EPA vision and strategy?

Today we'd like feedback on EPA's future vision for citizen science

1. What kind of product would be most valuable? (e.g. policy memo, roadmap, strategy, framework, etc.)
2. Should a strategy identify EPA priority areas (e.g. risk communication, disaster response) and/or environmental issues (e.g. drinking water)?
3. How do we link citizen science to EPA's strategic plan? (e.g. public engagement)
4. Other ideas?

Additional background material on the next few slides

## Many Ideas in the NACEPT reports (2016, 2018)

### Environmental Protection Belongs to the Public

#### A Vision for Citizen Science at EPA

National Advisory Council for Environmental Policy  
and Technology (NACEPT)

December 2016

EPA 219-R-16-001

### Information to Action

#### Strengthening EPA Citizen Science Partnerships for Environmental Protection

National Advisory Council for Environmental Policy  
and Technology (NACEPT)

April 2018

EPA 220-R-18-001

# Citizen science touches all EPA work

**Community engagement:** awareness, partnership, development, stakeholder engagement, public outreach

**Case Studies:**

Citizen Science in Great Smoky Mountains National Park  
Environmental Health Organizing in El Paso, Texas

**Condition indicator:** media campaign, cross-sector stakeholder involvement, request for further study or involvement by government agency and/or research institutions

**Case Studies:**

Argentine/Turner Rail Yard Community Air Pollution Monitoring  
Southeast Alaska Tribal Toxins Partnership

**Management decisions:** remediation, restoration, community solution enactment

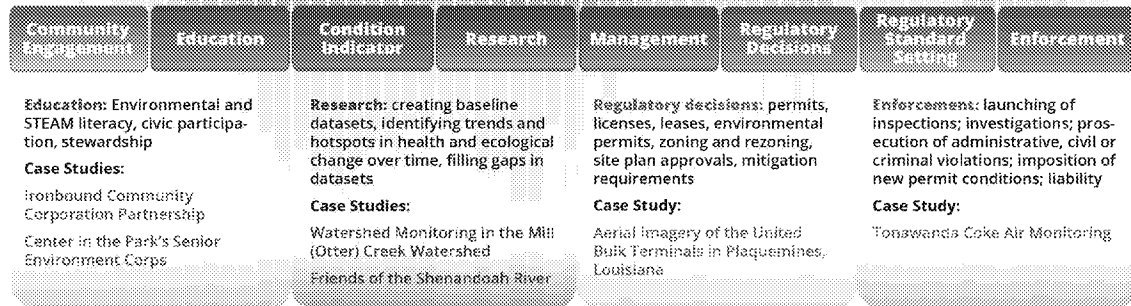

**Case Studies:**

Canton Creek Snorkel Survey  
Composting Food Waste with Fermentation

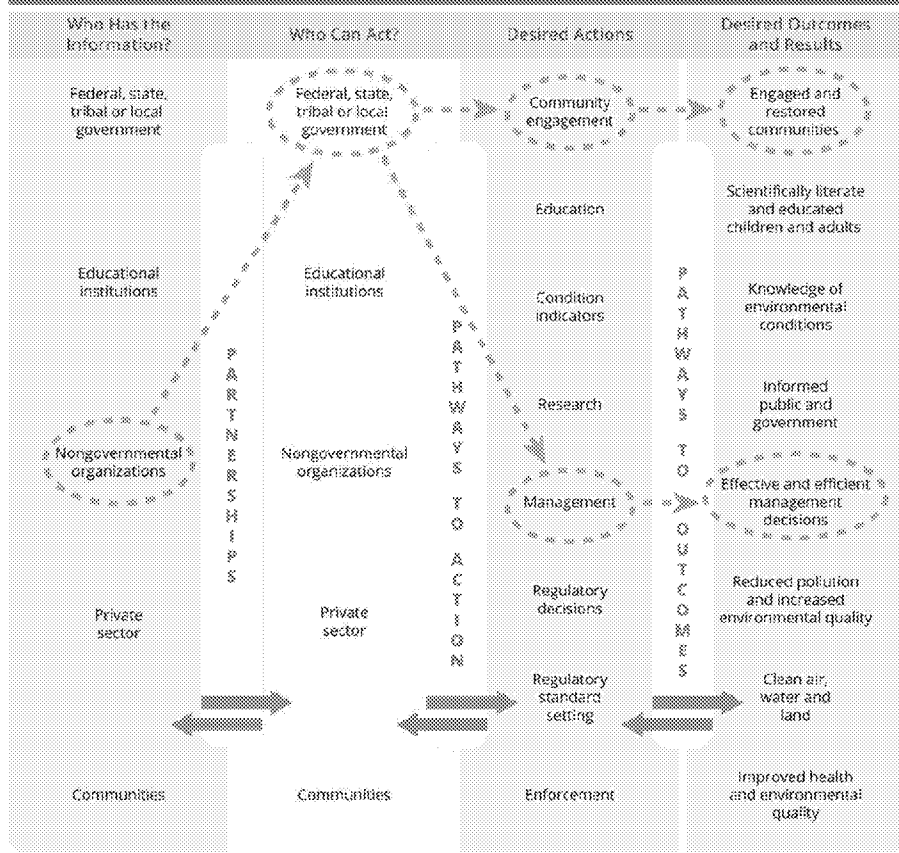

**Regulatory standard setting:** new mandatory and voluntary standards, development of best practices, revision of prior standards, changes in methodologies for measuring compliance status

**Case Study:**

The Dewey-Humboldt Arizona Garden Project

## Pathways From Information to Action

## OIG Identified Barriers to Using Citizen Science Results in EPA's Work

EPA staff identified identified five barriers:

1. Strategic communication and support/resources
2. Understanding/acceptance
3. Data quality
4. Data management
5. Technology

(from OIG survey of EPA staff – page 15 of draft report)

## What kind of strategy document does EPA need?

### Examples from other organizations

- USGS -- Partnering for Science: Proceedings of the US Geological Survey Workshop on Citizen Science
- NASA -- Improving Crowdsourcing and Citizen Science as Policy Mechanism for NASA
- US FWS -- Citizen Science Framework Review: Independent Science Review conducted for the US Fish and Wildlife Service
